

Bee Engaged™ Workshop

A practical workshop to improve motivation, happiness, employee engagement and productivity.

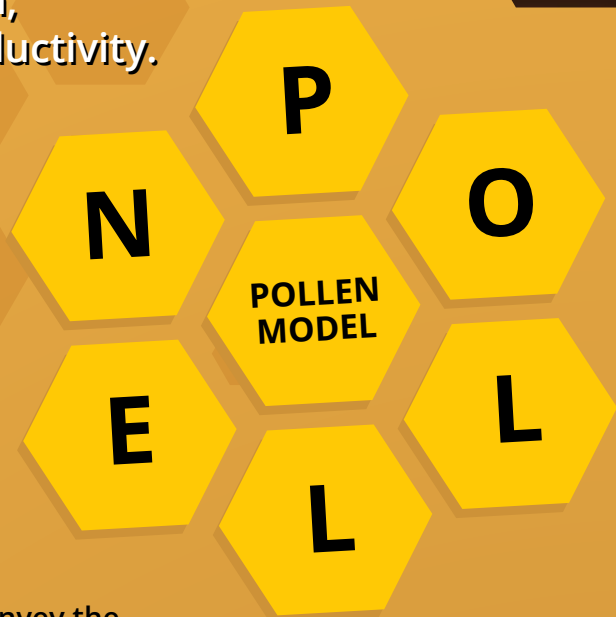

Bee Engaged™ workshop is a no-nonsense approach to understanding how to engage employees for better results. After all, improving employee engagement will understandably improve productivity.

Bee Engaged™ workshop is all about making your organisation the best place to work whilst achieving your objectives and improving shareholder wealth.

Using extensive research and knowledge from the world's top academics and the author's own practical experience we apply the theory to practice. This workshop is all about practicality.

Bee Engaged™ workshop uses the story *The Bee Book* to convey the P-O-L-L-E-N™ Model of employee engagement to help leaders, managers and employees at any level, learn how to be more productive and enjoy what they do. Employee engagement is a soft skill which delivers hard results. The ROE (return on engagement) increases the ROI (return on investment). Everyone needs to understand the importance and the effect an engaged or disengaged employee can have on an organisation.

This workshop engages, stimulates and educates the learner in a way that ensures retention and application of knowledge is maximised. It is fun, engaging, thought provoking and filled with practical knowledge to help improve employee engagement and productivity within your organisation.

Helping people
**CHANGE, INNOVATE,
ENGAGE AND LEAD**

The learning objectives for this programme are:

- Learn how to make your organisation the best place to work whilst improving results
- Understand the difference between engagement, motivation, happiness and satisfaction and their implications on the organisation
- Use The Bee Book to help transform the story of a hive of bees to real world situations
- Employee engagement lessons we can learn from bees
- Develop a common language (based on the story of the bees) to be used throughout the organisation for practical engagement
- Use the P-O-L-L-E-N™ Model of employee engagement to help participants easily remember the steps for effective and practical implementation
- Understand how ROE increases ROI
- Understand how better to engage with employees, leaders and customers for obvious benefits
- Compare the two hives in The Bee Book and relate to participants actual situation
- Look at your leadership employee engagement traits (via an assessment completed in the workshop) to help improve your leadership style to achieve better results
- Complete a 30, 60, 90, 120 day action plan to help participants understand where they need to focus in order to improve employee engagement
- Motivate participants to want to perform to the highest standards
- Become an engaged leader

A short pre-read of The Bee Book is a recommended prerequisite.

Who should attend this workshop?

Leaders and managers who want to make a difference and attain better results; Leaders who wish to get more from their employees; Leaders and managers who care about their employees and want to make their organisation the best place to work; and the employees themselves.

Duration: 2 days

We believe, based on extensive experience, that one day is just not enough time to digest and really take on board the key learning objectives. Please allocate two days. You will not be disappointed.

Number of participants: Ideally 20 to 30

We generally recommend 4 tables of 6 participants. This allows excellent interaction and maximum participation. This is not training, this is a facilitated workshop. It is important to keep all participants actively engaged throughout in order to maximise the learning experience.

TTT (Train-The-Trainer) option available
